File Description:	Calendar Month end
	Weekly

The Name and Address Transmission file contains customer name and address information required to open and maintain a brokerage account on the Clearing and Custody platform. The file includes data such as the account registration details, account and customer level detail, interested parties, additional stakeholders and affiliations.

Supports Clearing, Custody Clients or in certain cases, a client's approved Fintech providers.

Please Note: Information or functionality that may be provided is based on a firm's authorization and may be subject to restrictions.

File Processing Guidelines:

The Name and Address Transmission file is a 700-byte file with a Header and Trailer record. The file contains 14 record types.

The file contains customer name and address data from the ICS Name & Address system in FBSI. It is primarily derived from the data which is displayed on the BNAM DISP CUST/ADDL, FBSI, AFF, LEGL, BOOK, ENTF, IPCS and ASTK screens, and which is viewable in various screens on Wealthscape.

The file is available as either a Full File or a Daily Delta file.

Full File – This file contains the name and address base for the requested accounts under a Super Branch based on the selected frequency. Depending on the Option listed below, all record numbers are delivered provided data exists for that record.

Daily Delta - Daily delta files include all new accounts added and/or changed on the previous business day.

This transmission is sourced from 16 FBSI screens. Records are included based on your Books & Records Option selection.

Record	Description	Primary source	Primary Information	Books & Records Option
101	Customer	BNAM DI SP CUST	Basic customer account	BNY
102	FFR	BNAM DI SP CUST/ADDL	Fixed format registration (FFR)	BY
103	FFR	BNAM DI SP CUST/ADDL	Fixed format registration (FFR)	BY
104	FBSI	BNAM DI SP FBSI	Telephone number and bank information	BNY
107	Employer	BNAM DI SP AFF	Employer and affiliation	B
113	FFR	BNAM DI SP CUST/ADDL	Fixed format registration (FFR)	BY
115	Legal	BNAM DI SP LEGL	Legal information	B
2X0	Customer	BNAM DI SP BOOK	Customer and telephone information	B
2X1	Mailing address	BNAM DI SP BOOK	Mailing address information	B
2X2	Legal address	BNAM DI SP BOOK	Legal address information	B
2X3	Affiliation address	BNAM DI SP BOOK	Affiliation address information	B
3X0	Email	BNAM DI SP ENTF	Email and notification	B
900	Account stakeholder	BNAM DI SP ASTK	Account stakeholder information	BNY
900	Trusted Contact	BNAM DI SP TCPN	Trusted Contact Persons	BNY
901-997	IPCS	BNAM DI SP IPCS	Interested party confirm and statement	BNY
998-999	IPID	BNAM DI SP IPID	Interested party institutional delivery	BNY

The Fixed Format Registration (FFR) 101 records contain the customer name and address as it is displayed in the “6-by-32” name and address fields on BNAM DISP CUST and sent in the file as field names “NAME AND ADDRESS LINE 1 (-6)”. These records concatenate (join) first, middle and last names and city, state and zip code and are unformatted.

The FFR 102, 103 and 113 records contain account and account owner registration information with unique formatted fields. The 102 record contains formatted street address lines, city, state, zip code and country code. The 102 record also contains account owner registration information such as first, middle, last name, birth date and SSN or TIN for the first three account owners.

The 103 record contains account owner registration information such as first, middle, last name, birth date and SSN or TIN for the next three account owners. The 113 record contains account owner registration information such as first, middle, last name, birth date and SSN or TIN for the last two account owners

The 104 records also contain information about call back numbers, trading authorization and bank information. This information is derived primarily from the BNAM DISP CUST and BNAM DISP ADDL screens. 104 record information is useful when sending mailings or conducting queries based on information contained in the account registration.

Employer and affiliation information from BNAM DISP AFF is contained in the 107 records. Account-level legal information from BNAM DISP LEGL is contained in the 115 records. Enotification information (including email addresses) from BNAM DISP ENTF is contained in the 3X0 records.

The 2X series Books & Records records provide additional information about telephone, mailing address, legal address and affiliation address of each account owner. Books & Records is derived primarily from the BNAM DISP CUST, BNAM DISP FBSI and BNAM DISP BOOK screens. Books & Records information is useful in retrieving information required by the USA Patriot Act and similar regulations.

Customer information submitted by Fidelity to FINRA pursuant to the Customer and Account Information System (CAIS) reporting appear in the 2X0 records for account owners and the 900 records for authorized traders.

The file provides customer name and address data for all accounts in your super branch. The file size will vary depending on the number of accounts added or changed on a given day.

RECORD DEFINITION

Each record is identified by the RECORD NUMBER located at position 2-4 of each record.

The possible record numbers are 101, 102, 103, 104, 107, 113, 115, 2X0, 2X1, 2X2, 2X3, 3X0 and 900-999. For example, if an account has a Customer record, FFR record, FBSI record, BOOK customer record and IPCS record, the account will produce a set of five records for the account (101, 102, 104, 210 and 901). The 900 records do not increment; multiple records are identified as 900. The 901-999 records increment; multiple records are identified as 901, 902, etc.

The 900 records are multiple-use records - they can be Account Stakeholder, Authorized Trader or Trusted Contact records. Account Stakeholder and Authorized Trader records are identified by ASTK RELATIONSHIP CODE. Trusted Contact (TCPN) records are identified by ASTK/TCPN STAKEHOLDER TYPE.

The IPCS 901-999 records increment; multiple records are identified as 901, 902, etc. and remain associated with the record detail. If a 902 record

is removed from a series of three IPCS records (901, 902, 903), the remaining two records are identified as 901 and 903.

The Full File will include all applicable records for each account. If no data exists for the record (e.g. no 103 data), the record will not be included. There can be 104 records with no logical data other than BRANCH and ACCOUNT NUMBER.

The Daily Delta file will only include those accounts updated on the file date. For updated records, the entire set of 101, 102, 103, 107, 113, 115, 2X0, 2X1, 2X2, 2X3 and 3X0 are sent as a group, providing data exists for that record. Record 104 may be sent even though there are no changes to the record and may be unaccompanied by any other record segment. Records 900-999 are only sent if a change was made to that record and may be unaccompanied by record segments or other existing 900 records if there are no other changes.

Delete records can be sent for the 900 series records only. Delete records are identified by a "D999" in the FIRM field followed by BRANCH, ACCOUNT NUMBER, RECORD NUMBER and ASTK CUSTOMER ID. The remainder of the record is empty.

Trusted Contact "D999" delete records are only sent if the last one or both Trusted Contacts are deleted at the same time. If a Primary Trusted Contact is deleted, the Secondary Trusted Contact will be changed to a Primary Trusted Contact and sent as a change record. In this case there is no Primary Trusted Contact "D999" record.

FIXED FORMAT REGISTRATION (FFR) PROCESSING

The FFR records will contain the eight possible registration names on the account. Record 102 contains FFR registration for account owners 1, 2 and 3. Record 103 contains FFR registration for account owners 4, 5 and 6. Record 113 contains FFR registration for account owners 7 and 8.

The layout of record 102, 103 and 113 will change depending on whether the registration is a business or a person. In Record 102, at position 191-191, the FIXED FORMAT NAME TYPE will be populated either with a B or P. The succeeding layout from position 193 through 267 will change depending on whether FIXED FORMAT NAME TYPE contains a B or P. The Business Definition/Processing Guidelines for fields in this section indicate whether the field is part of the B or P sequence.

The 115 record contains a seasonal address section beginning at position 225. The seasonal address is inactive when the SEASONAL ADDRESS TYPE CODE field is populated with S1. When inactive, the seasonal address is contained in the address field beginning at position 246. When the seasonal address is active, the SEASONAL ADDRESS TYPE CODE field is populated with SP. When active, the seasonal address is moved to the address fields in record 101 and the permanent 101 address is moved to the record 115 address fields. The SEASONAL ADDRESS START DATE and END DATE define when the seasonal address is active. The SEASONAL ADDRESS STATUS CODE identifies whether the seasonal address is active, inactive or has an error that needs to be corrected.

BOOKS AND RECORDS PROCESSING

For BNAM DISP BOOK records, the X represents a unique account owner. For example: If 3 unique owners are associated with an account you could receive up to four 700-byte records for each:

1st account owner: 210, 211, 212, 213
2nd account owner: 220, 221, 222, 223
3rd account owner: 230, 231, 232, 233

You will always receive a 2X0 record for accounts established after December 2006. For accounts established prior to that date, there may be

instances where an account does not have data in FBSI BOOK and no 2X0 record will be transmitted. You will only receive the additional segments if they contain data. For example, in the case where there is no mailing address information on file, you will receive a 210 record followed by a 212 record and a 213 record. The record segments will always be sent in numerical order.

The 102, 103, 113 FFR XREF fields can be used to match records with the FFR XREF field at Position 18-26 of the 2X0 record. The X value of this record is then used to match records to the 2X1, 2X2 and 2X3 records.

Field Name	Business Definition / Processing Guidelines	Rec #	Pos	Lngh	Format	On-Line Reference	Possible Values
RECORD TYPE	Indicates a field that governs the record layout for this segment depending on the value in the field. This is the Header (H) record segment.	Header	1-1	1	AN PIC X(1)		
HEADER RECORD CLIENT ID	Identifies the client data to follow. This field will typically be the SuperBranch for the given client.	Header	2-4	3	AN PIC X(3)		
FILLER	FILLER - Internal use only.	Header	5-21	17	AN PIC X(17)		
FILE ORIGIN	Variable-character alpha string identifying the sender.	Header	22-37	16	AN PIC X(16)		FIDELITY SYSTEMS Identifies Fidelity as the sender National Financial Services LLC Identifies National Financial Services LLC as the sender NFSC SYSTEMS Identifies Fidelity as the sender - (Bookkeeping 101-byte Only)
