Tax Accounting System (TAS) Closed Lot Transmission File Manual

Version: 4.2.3

Fidelity Investments

Available Frequencies: **Daily**

Weekly

File Description:

The Tax Accounting System (TAS) Closed Lot Transmission provides cost basis and realized gain/loss information for settled and unsettled positions. The file provides lot level details such as price, cost basis, market value, cost basis source and status.

Supports Clearing Clients, Custody Clients or in certain cases, a client's approved Fintech providers.

Please Note: Information or functionality that may be provided is based on a firm's authorization and may be subject to restrictions.

File Processing Guidelines:

The Tax Accounting System (TAS) Closed Lot Transmission file is a 1000-byte file with a Header and Trailer record.

The file provides cost basis and gain/loss information of unsettled and settled lot level securities positions. It contains information such as lot price, cost basis, realized gain/loss and market value. It also contains the source and status of cost basis information. Other information is included such as holding period, fractured lot, wash sale and short sale. Much of this information is 1099B reportable and is found in Wealthscape℠. However, this file contains records for events such as journals between account types (cash, margin, etc.) that are not 1099B reportable and the 1099 REPORTABILITY INDICATOR = N.

The Tax Accounting System (TAS) Closed Lot Transmission has the following availability:

1. Weekly Full file provides a full refresh of lot data for all accounts as of the completion of the Friday batch cycle.

2. Daily Delta file provides lot data for all added, changed or deleted lots in the current batch cycle.

For the Weekly Full file, all lots closed in the current calendar year are included. The TAS DELTA INDICATOR is empty in this version.

For the Daily Delta file, the TAS DELTA INDICATOR is used to identify added, changed or deleted records. The lot data for the current cycle is compared to the previous cycle.

Added closed lot(s) to existing accounts: TAS DELTA INDICATOR = A
Added account(s): TAS DELTA INDICATOR = A
Change to an existing closed lot: TAS DELTA INDICATOR = C
Closed lot event cancelled (trade cancel): TAS DELTA INDICATOR = D (All amounts set to zero)
Inactive account: No record
Deleted account: No record
Intraday trades (no closing position): TAS DELTA INDICATOR = A

A change to any one of the following fields triggers a change record (TAS DELTA INDICATOR = C)

* except when both LOT COST BASIS METHOD CODE and POSITION COST BASIS METHOD CODE = A

Delete records are sent on the first file of a new year for all closed lots that are no longer reportable (new year -2).

Average cost lots are aggregated (rolled up) to a summary level. A lot is considered an average cost lot if the LOT COST BASIS METHOD CODE = A and the POSITION COST BASIS METHOD CODE = A. The aggregation key fields are:

BRANCH
ACCOUNT NUMBER
ACCOUNT TYPE
CUSIP
CBL COVERED LOT INDICATOR
GIFTED LOT DATE
HOLDING PERIOD/FRACTURED LOT INDICATOR

Beginning with the business cycle date 2/17/2017 file, the Tax Accounting System (TAS) Closed Lot Delta file contains prior-year closed lot adjustments, including but not limited to IRS Form 1099-B adjustments. These are identified where the year appearing in CLOSED LOT TRADE DATE is prior to the year in the HEADER DATE of the file. The Tax Accounting System (TAS) Closed Lot Full (Weekly) file does not contain prior-year closed lot adjustments. In reconciling the Delta file to the Full file, prior-year adjustments should be removed.

There are no Tax Accounting System records for these positions:
• Free cash credit interest reportable on IRS Form 1099-INT and money market fund dividends reportable on IRS Form 1099-DIV.
• Alternative Investments marked as Suppressed in TASView.
• ACCOUNT CLASSIFICATION '40' or '80' proprietary accounts.
